From 1979 to 1990, he was engaged in regional mapping for the Geological Survey of Canada. He received his B.S. in geoscience from Hobart College in 1979, an M.S. in geology from the University of Montana in 1981, and a Ph.D. in geology from Virginia Polytechnic Institute and State University in 1985. How Do Magmas Form? In 2005, he moved from MIT to Caltech, where he is the Fletcher Jones Professor of Geology. Jordan received his B.A., M.S., and Ph.D. (1972) from the California Institute of Technology. Jordan established SCEC's Collaboratory for the Study of Earthquake Predictability and has been the lead SCEC investigator on projects to create and improve a time-dependent, uniform California earthquake rupture forecast. He chaired the NRC panels that produced two decadal reports, Living on an Active Earth: Perspectives on Earthquake Science (2003) and Basic Research Opportunities in Earth Sciences (2002). Geological Survey. M. As SCEC's principal investigator since 2002, he has overseen all aspects of its program in earthquake system science, which currently involves over 600 scientists at more than 60 universities and research institutions worldwide (). He currently chairs the International Commission on Earthquake Forecasting for Civil Protection (appointed by the Italian government), is a member of the California Earthquake Prediction Evaluation Council, and has served on the Scientific Earthquake Studies Advisory Committee of the U. He currently works as a geologist on the Mars Exploration Rover team, the first mission to conduct ground-based exploration of the bedrock geology of another planet, which has resulted in the discovery sedimentary rocks formed in aqueous depositional environments. John Grotzinger is a field geologist interested in the evolution of the Earth's surface environments and biosphere. He has contributed to developing the basic geologic framework of a number of sedimentary basins and orogenic belts in northwestern Canada, northern Siberia, southern Africa, and the western United States. He served as the head of MIT's Department of Earth, Atmospheric and Planetary Sciences for the decade 1988-1998. His other interests include continental formation and tectonic evolution, mantle dynamics, and statistical descriptions of geologic phenomena. Schrock Professor of Earth and Planetary Sciences.
